The death of Prof. G. Brown Goode, Director of the U. S. National Museum, Washington, D. C., September 6, 1896, æt. 46, was announced.

Dr. Brinton read a paper on the "Vocabulary of the Noanama Dialect of the Choco Stock."

Dr. Horn spoke of the difficulties of reporting these unwritten dialects owing to the absence of a standard of pronunciation. He also adverted to the evident use of the "r" sound, which was absent in the Indian dialects of western America.

Dr. Frazer suggested the use of the symbols made by the phonographic stylus, as he had described them in a paper read before this Society, April 5, 1878.

Pending nominations 1332, 1334, 1357, 1358, 1359 and new nominations 1360 and 1361 were read.

The rough minutes were read and approved, and the Society adjourned by the presiding member.

Vocabulary of the Noanama Dialect of the Choco Stock.

By Daniel G. Brinton, M.D.

(Read before the American Philosophical Society, Sept. 18, 1896).

In the *Proceedings* of this Society for November last (Vol. xxxiv, pp. 401, 402), I presented a short vocabulary of the Andagueda dialect of the Choco stock, obtained by Mr. Henry Gregory Granger on the upper waters of the Atrato river, Colombia, South America.

During the summer of the present year, Mr. Granger visited the west coast of Colombia, and at the mouth of the river San Juan (N. lat. 5°) met a tribe of about fifty Indians, who spoke an idiom, said not to be understood by those of the interior or the other coast tribes. They are still rather primitive in culture and have the peculiarity of piercing their ears to form apertures about half an inch in diameter, in which they insert bunches of sweet-smelling herbs.
